

What we pay for payments & maps

Quick note on the two tools behind every ride: MyFatoorah takes the money, Mapbox handles locations and the map. All numbers below are in USD.

MyFatoorah (payments)

This is how guests pay: Visa / Mastercard, Apple Pay, and Google Pay. Same idea for all of them - MyFatoorah keeps a small cut from each ride payment.

Rough cost we use for planning:

About 2.5% + \$0.30 per payment.

Apple Pay and Google Pay cost the same as a normal card - not extra.

Example 1 - one \$80 ride

Fee = 2.5% of \$80 + \$0.30 = \$2.30

We keep about \$77.70 from that booking.

Mapbox (locations & map)

Used when someone picks pickup / dropoff, sees the map, the route, and the traffic time estimate.

Mapbox gives a free monthly allowance. At our usual volume we stay inside it, so map cost is basically \$0.

They also have a prepaid balance (like a wallet): we can put money in, and Mapbox takes from it when we go over the free limit.

Example 2 - a normal month (500 rides)

If average ride is \$80:

- Bookings: $500 \times \$80 = \$40,000$
- MyFatoorah: about $500 \times \$2.30 = \$1,150$
- Mapbox: about \$0 (still in free allowance)

So for that month, platform cost is roughly \$1,150 - almost all from payments.

Same month on Mapbox if there was no free allowance

For those 500 rides we roughly use:

- 1,000 location searches -> about \$11.50
- 500 route / ETA checks -> about \$1.00
- 1,500 map views -> about \$7.50

Mapbox total without free tier: about \$20 for the month.

MyFatoorah's exact % comes from our signed deal with them - the 2.5% + \$0.30 is what we use to explain the cost simply. Mapbox numbers follow their public pricing.
